

Construction Start Date – 5th March 2018

Our construction team will be visible on site from the 22nd of April to start vegetation clearance, the construction works will not start until the 5th of March.

Breezehill Northampton

As part of a flood alleviation project we are intending to carryout works in the local area to protect a number of properties that have suffered both internal and external flooding for a number of years.

About this project

The works will involve the installation of an underground storage tank at the North end of the Wootton Community and Sports Centre recreation field which is designed to attenuate surface water flow.

A new sewer will also be constructed from Breezehill along the footpath towards the playing fields into the underground storage tank. The tank will be connected back into the existing sewer in Nettle Gap Close.

Footpath Closures

We will be placing footpath closures along the footpath between Water Lane and Curtlee Hill. There will be strictly no access at these times; however diversion routes will be made available. Access to the footpath via the following streets will be prohibited during the dates stated;

Foseberry Close 2nd April – 22nd June 2018

Nettle gap Close 2nd April – 22nd June 2018

Breezehill 2nd April – 4th May 2018
